

Sean McCusker

JUNIOR WEB DEVELOPER

Executive Summary

I am a multifaceted professional who has recently retrained to be a Junior Web Developer. I come alive when I am working on code. I do not give up and I keep working until I get the issue resolved. This constant challenge is what I love about being a developer. I believe in integrity, teamwork, striving for excellence, and social responsibility. I would love to join a company that has a culture of learning and innovating.

Projects at General Assembly

Project 1, was created in Ruby on Rails and used Bootstrap CSS: <https://chefztable.herokuapp.com/>

Project 2, was a group project that was built with Ruby on Rails for the backend and D3.JS library to visualise data on the front end.
<https://declanboller.github.io/Visualeyes-Client/>

Project 3 was building an api from the ground up. There is not a lot of brewery api's that have Australian microbrews represented. This was achieved by Ruby on Rails on the backend and React for the front end.
